## CONFIDENTIAL

## Page Two

- "Hangars: there are probably six hangars. (From the road, it is difficult to discern the exact number; one of the buildings may be a barracks.) 6. In the Spring of 1953, there was still an accumulation of coment and
- "Readiness platform: a readiness platform /? 7 of reinforced concrete was under construction in the summer of 1952; it was located near the 7.
- 8. "Operator: as of Spring 1953 the airfield was still operated by the T.A.k.S., (Soviet-Rumanian Air Company.)
- "Climate: the climate is good, rarely foggy. Winter snows do not hinder traffic on the airfield; summer and fall rains do not hinder 9. operations either, as the field surface is porous and dries immediately.
